- Corallian : limestone
- Kimmeridge Clay
- Gault Clay & Greensand
- Chalk

Stanton Harcourt is a small village lying in flat countryside with lakes created from gravel pits to the south, the river Windrush to the west, and the Thames to the east. Much of the medieval manor house was demolished around 1751 but the detached kitchen and a tower survive and provide memorable features. The Green neatly divides the village with thatched cottages to the south and stone roofed cottages to the north. The buildings are mostly built of stone and many include brick features such as arched brick window heads.

STANTON HARCOURT the Manor House sits amidst thatched cottages

upper the flat landscape at the south end at junction with Steadys Lane

lower looking north towards the Green with White Cottage on the left
